

Custom Molded Stereo Challenger™ Series Earphones

- Frequency Response: 20Hz-20kHz; Impedance: 19ohms; Sensitivity: 98dB
- Eliminates Ambient Noise
- Exclusive Soft Silicone Comfort
- Light Weight and Durable
- Solid Colors, Swirls and Glitter Options available

Provide digital quality sound with sleek, stylish personalized earbuds. Challengers easily plug into an existing jack on all personal listening devices including; I-pods, MP3 Players, Laptops, Phones, Tablets and just about any audio system that uses a 3.5mm stereo phone plug.

Aurisonic Custom Digital Hybrid In-Ear Monitors

- Adjustable Bass (Optional)
- Adjustable Ambient (Optional)
- Ambient Hearing Port (Optional)
- Recessed Connector
- Short Comfort Tip
- Best Solution for High-end Production Sound

Aurisonics™ - "the Critical Difference" a world-wide manufacturer and supplier of in-ear products has launched our state-of-the-art **Digital-Hybrid In-Ear Monitor™** model AS-1.

The **AS-1** represents the next generation of in-ear monitoring technology which far surpasses the performance capabilities of other legacy designs with its vast feature set and available options. Multiple patents pending.

The bass response is truly legendary driven by a massive **15mm custom designed dynamic driver**. The driver is placed in the monitor at an optimal angle for maximum performance for each individual. The bass porting can be optimized for your particular preference with our optional bass tuner (AS-1b) which allows you to dial in your desired bass characteristics.

Specifications of the AS-1 Digital-Hybrid In-Ear Monitors™

- * 8Hz - 25kHz frequency response
- * 32ohm +/- 10% impedance @1kHz
- * Sensitivity 121dB @ 1mW
- * 15mm dynamic driver
